

Heart Shaped Stickers

supplying guide for heart shaped stickers

Your images must extend over the bleed!

Be aware of how large or small your sticker will be when printed. Large areas of text aren't recommended for small stickers.

Heart Shaped Stickers Checklist

- ✓ Artwork is 300dpi
- ✓ CMYK Colour profile
- ✓ All fonts embedded
- ✓ Keep text to at least 6pt to ensure legibility.
- ✓ Keep main artwork within the white area

Bleed (3mm)

The bleed area extends 3mm beyond the edge of your finished document. Colours and images must extend beyond the edge of the document to prevent unwanted white borders around the edge of your finished document. Note that this 'bleed' will be trimmed during the finishing process so ensure that no important details are set up to print in this area.

Safe Area (3mm)

It is recommended that your artwork is at least 3mm from the edge of the page if it is not meant to bleed off. Printed borders placed too close to the edge of a page may look uneven when the job is trimmed.

We supply your heart shaped stickers kiss-cut on A4 sheets.
